Canadian Journal of Environmental Education

Volume 23(1), 2020

The Canadian Journal of Environmental Education is a refereed journal published once a year. It seeks to further the study and practice of environmental education by providing a thoughtful forum for researchers, scholars, practitioners, and post-secondary students. The publication and distribution of articles and reviews should contribute to Canadian thought and practice in environmental education and/or issues and practices of international importance to this field of study.

The views expressed in this journal are not necessarily those of the journal’s editors, advisory editors, or supporters. The Canadian Journal of Environmental Education publishes material that may represent divergent ideas, judgments, and opinions.

The production of Volume 23(1) has been made possible through the generous support of EECOM Standing Committee on Environmental and Sustainability Education in Teacher Education, Brock University, Université de Saint-Boniface, OISE at the University of Toronto, and Lakehead University.

Sheila Karrow is a visual artist and educator from Haida Gwaii, British Columbia. Focusing on artist-teacher relationships in the classroom informed by place and culture, Karrow is currently in her second year of a PhD program in Curriculum Studies at the University of Victoria. Karrow’s paintings communicate both a literal and metaphorical understanding of the natural world. She strives for an intimate connection with the subject yet also reveals the unknowable reality of such a form. Carefully rendered images in acrylic and watercolour express a didactic blend of extreme detail with narrative, combining realism, symbolism and abstraction.
